

PALM MIX

PRODUCT DESCRIPTION:

Palm Mix is a mixture of sand, screened sandy loam topsoil, pine bark and fir shavings. Organic components are fortified with iron and nitrogen.

PRODUCT USES:

Palm Mix is particularly suited for use in planting palm trees. Palm Mix can be used as a backfill for bareroot or container grown plants.

PRODUCT ANALYSIS:

ph*5.5 –7.5
Ece*0.3 dS/m

*Ece (salinity) and pH (acid/bse) determinations are made on each soil product on a regular basis to assure product standards. Data subject to change. Additional soil data is available upon request.
