

CLASS "A" TOPSOIL

PRODUCT DESCRIPTION

Class A Topsoil is a special mixture of sand, silt and clay. Our Class A Topsoil is un-amended, which provides excellent sandy loam topsoil with a consistent texture.

PRODUCT USES:

Class A Topsoil is intended primarily for use wherever a Class A is needed. Class A Topsoil can also be blended with a variety of soil amendments for back-filling planting holes for trees and shrubs. To enhance the structure of Class A Topsoil for improved plant growth, it is recommended that a quality organic amendment (such as our Envirohumus/Compost) be incorporated at the rate of 20 to 30% by volume. A pre-plant fertilizer and gypsum are recommended.

ANALYSIS:

Screen size	1/2 "
Sand.....	65-75%
Silt.....	15-20%
Clay.....	10-14%
PH.....	6.0-7.5
Ece.....	0-3dS/m
