

## STUMP WOOD 3" - 3/8"

This product is fibrous, containing a high percentage tree stump grindings. It is highly effective for mulching and erosion control. It is commonly used for garden paths, mulching tree basins, and large non-landscaped areas such as roadway medians and rights of way. If placed sufficiently dense, it will retard weed growth while providing the other benefits of mulching. This product is orange tint mulch and holds its color. This product is not recommended for playground use. Application rates are recommended at a minimum of 3 cubic yards per 1,000 square feet, which will provide 1 inch of mulch depth, to as much as 12 cubic yards per 1,000 square feet, which will provide up to 4 inches of mulch depth

### SPECIFICATION

The mulch shall consist of fibrous, tree stump grinding recycled mixture of various particle sizes.

<b>PHYSICAL PROPERTIES:</b>	<b><u>PERCENT PASSING</u></b>	<b><u>SIEVE SIZE</u></b>
	90-100	25.4MM (1")
	80-100	12.7MM (1/2")
		6.35MM (1/4")
