

ESTIMATING THE AMOUNT OF MATERIAL FOR YOUR JOB

INCHES	FEET
1	.08
2	.17
3	.25
4	.33
5	.42
6	.50
7	.58
8	.67
9	.75
10	.83
11	.92
12	1.00

Multiply the length, width and depth (all in feet) of the area to be filled, then divide that by 27 cubic feet to get the total amount of cubic yards in the area you are filling.

LENGTH (FEET) X WIDTH (FEET) X DEPTH (FEET)

27

= TOTAL CUBIC YARDS

NOTE: When ordering, please allow for additional material to compensate for loss of volume due to compaction method and type of material.
