

POTTING / CONTAINER MIX

PRODUCT DESCRIPTION:

Potting / Container Mix is a lightweight blend of nitrolized redwood, forest humus, canadian sphagnum peat moss, washed horticultural sand, perlite, fir shavings and a wetting agent to enhance water penetration. This unique blend of materials allows for a light and loose mixture with excellent soil porosity.

PRODUCT USES:

Potting / Container Mix can be used for indoor and outdoor pots and planter boxes. A pre-plant fertilizer is recommended.

ANALYSIS:

pH* 5.5 – 6.0

ECe* 0.2 – 0.6 dS/m

Percentages: Forest Humus 40% / Nitrolized Fir Shavings 30% / Peat Moss 10% / Sand 5% / Perlite 5%
Poultry Manure 5% / Nitrolized Redwood 5%

*ECe (salinity) and pH (acid/base) determinations are made on each soil product on a regular basis to assure product standards. Additional soil data are available upon request.
