

PLANTER MIX

PRODUCT DESCRIPTION:

Planter Mix is a screened sandy loam topsoil, pine humus and Douglas fir shavings. Organic components are fortified with iron and nitrogen.

PRODUCT USES:

Planter Mix is designed for use in general planting including, but not limited to, vegetable gardens and flower beds. Planter Mix can also be used as a backfill for bare root or container grown plants.

ANALYSIS:

pH*	5.5 – 7.5
ECe*	0 - 3 dS/m

*ECe (salinity) and pH (acid/base) determinations are made on each soil product on a regular basis to assure product standards. Additional soil data are available upon request.
